Technical Skill

Programming languages:

Python, Java, JavaScript, C/C++,
Dart, HTML/CSS, SQL

Frameworks:

Django, Django REST, Flutter

Technologies / Tools:

PostgreSQL, Git/Github, Docker,
Google Cloud Platform (GCP)

Education

Candidate for Master of Science in Information Sciences

Tohoku University, Sendai, Japan,
April 2022 – March 2024 (Expected)

Bachelor of Engineering in Mechanical and Aerospace Engineering

Tohoku University, Sendai, Japan,
October 2017 – September 2021,
CGPA: 3.09

Language Skills

English: Business Level

- TOEFL iBT: 102/120
June 2021

Japanese: Business Level

- JLPT N1 Level: Passed (106/180)
December 2022

Indonesian: Native Speaker

Certifications

- IT Passport Examination: Passed
October 2022

Awards

- Recipient of Scholarship from
Sato Yo International
Scholarship Foundation (SISF) –
April 2022

Interests

Photography, Travelling, Reading

Relevant Experience / Projects

Trip Planner Mobile App

February 2023 – present

- Built a mobile app to find an optimal trip itinerary with **Flutter** framework with utilizing **Google Maps API** and **Django REST** framework as the backend to be submitted for 2023 Google Developer Solution Challenge.
- Responsible for developing and testing the backend API in a containerized environment by using **Docker** with **PostgreSQL** for the database.

Research on the effect of Mobility-as-a-Service (MaaS) platform on transportation network by agent-based simulation

October 2021 – present

- Currently conducting research on the effect of MaaS by developing an extension in agent-based transportation simulator in **Java**

Personal Website

February 2022

- Developed a personal website to showcase personal projects by using **HTML/CSS** and **JavaScript**

Visualisation of Static User Equilibrium assignment problem

December 2020 – January 2021

- Built a solver for static user equilibrium assignment problem in **Python** that can solve a relatively large network (24 nodes/76 links) in less than 12 seconds and used **NetworkX** package for visualisation of the result.

Finding Waldo

October 2019 – December 2019

- Created and trained a Haar Cascade object detection to find Waldo from 'Where's Waldo?' series by using **OpenCV** framework on top of **Python**.

Car Navigation System

December 2018 – January 2019

- Built a GUI-based car navigation system by using **C** language and **OpenGL** framework developed in **Linux** (Ubuntu) environment.

Extracurricular Activities

Member – Google Developer Student Clubs Tohoku

November 2022 – present

- Organize and prepare materials as well as example code for workshops.

Individual participant of Behaviour Modelling Summer School 2021

September 2021

- Teamed up with the other individual participants to analyse GPS data and to create behaviour discrete choice model in **Python**.
