WORK EXPERIENCE

Woven by Toyota **Tokyo, JP**
Software Engineer April 2024 - Present

- Proposed and productized a built-in VNC viewer feature for a VS Code extension, eliminating the need for users to install third-party VNC software.
- Collaborated with UX team to expand the capability of the VS Code extension with features such as automatic test steps generation (patent filed), test steps validation, and tests execution
- Implemented a per-test-case artifact retrieval system, reducing total test artifact size by 25% for consecutive runs on the same test bench.
- Designed and implemented a data communication bridge between simulated environment and system under test in C++ with CycloneDDS
- Automated the process of updating lock files during dependency updates, completely removing the manual process.

Software Engineer Intern August 2023 - November 2023

- Developed VS Code extension for Gherkin language support with autocomplete to enable users write pre-defined test steps quicker by 30.6%
- Collaborated with team members to define the format of the pre-defined test step catalog generated to enable the documentation of the test step shown while editing, reducing documentation lookup by 80.6%

PROJECTS

Trip Planner Mobile App

- Built a mobile app to find an optimal trip itinerary with Flutter framework utilizing Google Maps API and Django REST framework as the backend to be submitted for 2023 Google Developer Solution Challenge
- Developed and tested the backend API using a containerized environment (Docker/PostgreSQL).

Finding Waldo

- Created and trained a Haar Cascade object detection model to find Waldo from the ‘Where’s Waldo?’ series using the OpenCV framework in Python.

Car Navigation System

- Built a GUI-based car navigation system by using C language and OpenGL framework developed in Linux (Ubuntu) environment

SKILLS & INTERESTS

Programming Languages: Python, Go, TypeScript, C++, HTML/CSS | *Tools*: Git/GitHub, PostgreSQL, Docker
Languages: Business Japanese, Native Indonesian | *Interests*: photography, cooking, hiking

CERTIFICATIONS

ISTQB Foundation | Fundamental Information Technology Engineer | JLPT N1

EDUCATION

Tohoku University **Sendai, JP**
Master of Science in Information Sciences March 2024
